

audio-visual solutions for every purpose

Mediascape Ltd designs, supplies, installs and maintains integrated audio-visual systems throughout Central Scotland. Centrally located in Glasgow's Port Dundas area and in the South Gyle Estate in Edinburgh, Mediascape are well placed to cater for all your audio-visual requirements. Our sales and technical design team can offer a comprehensive service to keep all your audio-visual equipment running smoothly and have extensive knowledge and experience in creating the correct solution for our clients. We can advise on upgrade paths that are available and can also supply the full range of custom built Media/Teaching Walls.

We supply conference rooms, visitor centres, boardrooms, hotels, training rooms, classrooms, lecture theatres, retail outlets, universities, hospitals, councils and virtually any type of business from point of sale to corporate headquarters.

We are an appointed reseller for many leading brands such as NEC, Sony, Crestron, Anders & Kern, Samsung, Hitachi, Smart Technologies, One Lan, AMX and Polycom, and its extensive product portfolio includes plasma and LCD screen displays, projection and computer multimedia presentation equipment, static presentation and training equipment, video and audio conferencing, interactive whiteboards, video walls, professional and conference audio systems, integrated presentation and communication systems, integrated control systems, lighting rigs and control panels, audio-visual

networks, digital recording equipment, point of sales display systems, widescreen TVs, home cinema systems and complete presentation environment.

At Mediascape we take pride in providing the best possible products and services, closely tailored to the needs and budgets of our customers. Don't waste time online, we offer the best, most comprehensive package.

Mediascape is a dynamic young company founded in 2003 by an expert and enthusiastic audio-visual team with many years valuable experience in the Scottish A-V market.

Supplying audio visual equipment, turnkey boardroom and training room solutions from its Edinburgh and Glasgow locations, Mediascape Ltd. was set up nearly two years ago by Angus Knight, Managing Director, Shona Simpson, Director and John McGregor, Business Development Manager. They were previously employed by a UK wide company until it went into receivership in November 2003. The former employees decided to form Mediascape to accommodate the audio visual equipment needs of the Scottish marketplace. The initial staffs have been complemented by three additional engineers, including a Video Conferencing specialist and three internal office and sales staff.

Also joining the new company as a Director is Chris Montgomery of Sound & Vision AV Ltd., a well established UK

AV Presentation & Conference hire company. They have also formed a strategic alliance with Mitcorp Digital Solutions. Mitcorp are the UK's leading Sony Broadcast & Professional equipment distributor and they were sharing premises and have joint marketing initiatives. "With these alliances in place we are set to offer the client a 'one stop shop' facility from offices in both Glasgow City Centre and Edinburgh South Gyle area" said Angus Knight.

Comments Angus Knight, Managing Director, Mediascape, "We are delighted to be able to continue to serve the Scottish marketplace and provide a local service to companies who have enjoyed this in previous years. Additionally, our collaboration with Sound & Vision and Mitcorp Ltd. enables us to give our clients sales and hire options while considering a new piece of equipment, all under one roof."

Presentation Systems

Presentation systems come in all shapes and sizes, from fully mobile LCD projectors, smaller than the most up to date lap top computer to integrated and fully automatic purpose-built presentation rooms.

Mediascape can supply all your presentation needs, from a projector bulb to a fully furnished lecture theatre.

Mediascape design, manufacture and install fully integrated audio-visual presentation solutions for business, education, retail and tourism.

Using cutting edge technologies from the world's foremost a-v manufacturers, we ensure your facility is designed to the highest of standards and upgradeable for future requirements. Systems can be integrated into your existing presentation space, or developed from scratch. Integrated systems not only perform brilliantly, they are more reliable, conferring a sense of professionalism and style.

Video Conferencing

Video conferencing provides essential visual feedback to conversations and meetings held between people in diverse areas. Video conferencing systems are invaluable in connecting people in a virtual yet surprisingly personal sense, over large distances.

Mediascape supply and install a wide range of quality video and audio conferencing equipment. Whether it's upgrading existing installations or installing a new system, Mediascape have the technology! The latest digital IP systems overcome the bandwidth limitations of conventional ISDN video conferencing, providing crystal clear sound and vision.

Entertainment Systems

The availability of ever more sophisticated audio visual entertainment systems has enabled clubs, pubs, restaurants, fitness centres and many other leisure facilities and home-owners to enjoy cinema quality sound and large screen video. Mediascape supply and install entertainment systems

including plasma screens, LCD widescreen projectors, projection TVs, surround sound systems including DVD, VHS, MP3 all controlled by a fully integrated system.

System Integration & Maintenance Contracts

Mediascape can install product that has been purchased from other companies or has been transferred from another branch. We can also supply a comprehensive contract so that your products and systems achieve maximum picture and audio quality, even out of hours, our engineers have a dedicated telephone and pager system.
